Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate, teach or suggest a manufacturing method for a non-volatile semiconductor memory device substantially as claimed. For example, it is known in the art to form a non-volatile semiconductor memory device, wherein the method comprises: forming, in a semiconductor substrate, a well; forming semiconductor regions, which are used as a source and a drain, in the well; and forming a first gate, a second gate, and a third gate, as evidenced by Hsu et al. (US 6,232,173 B1). Furthermore, it is known in the art to form a non-volatile semiconductor memory device, wherein the method comprises: forming semiconductor regions, which are used as a source and a drain, in a semiconductor body; and forming an impurity doped region in a channel region between the source and the drain, as evidenced by Montree et al. (US 6,368,915 B1). However, the prior art of record does not anticipate, teach or suggest - either in combination or taken separately, a method for manufacturing a non-volatile semiconductor memory device substantially as claimed, wherein the method comprises: using one of the first, second, and third gates as a mask, forming the semiconductor regions and the impurity doped region in a self-alignment manner by tilted ion implantation tilted in opposite directions from a normal of the semiconductor substrate.
